Profile

I'm Faizal Sheikh, a dedicated web developer with over a year of professional experience. Specializing in responsive and dynamic websites, I've successfully completed five academic and three real-world projects. With a keen eye for detail and a focus on user experience, I strive to create memorable online experiences that leave a lasting impression. Passionate and eager to contribute my expertise to new projects.

Technical Skills

Languages: JavaScript, PHP, Html, TypeScript, Css
Technologies: Nest.js, Node.js, Express.js, jQuery, Bootstrap, Laravel, Underscore.js, MongoDb, MySql, API

Experience

IMENSO Software   March 2023 - Present
Backend Developer   *Indore, Madhya Pradesh*
- Implemented microservices architecture and management system with Node.js/Nest.js, boosting API response time by 25% and reducing server load by 30%.
- Developed an Event Management project using Laravel PHP for efficient volunteer and event management.

Projects

Job Tracker (Cunstruct Engrave) | *Angular, Nest.js, MongoDb*   https://job-tracker-dev.imenso.in/
- Developed a robust system for tracking client work, generating invoices, and managing comprehensive customer reports, including overdue payments and sales analytics.
- Created comprehensive reports for sales summaries and job list details, etc., enhancing data-driven decision-making processes.

Leads Management | *Angular, Nest.js, MongoDb, Tailwind Css*
- Led the development of a microservices-based HRM (Human Resource Management) and company management platform using Node.js, resulting in a 40% increase in daily communication and activity among employees.

Event Management (Concerted Usa) | *Laravel, PHP, MySql, Bootstrap*   https://www.concertedusa.org/
- Create an event management system streamlining scheduling, budgeting, ticketing, and volunteer management, ensuring seamless coordination and communication. Also facilitated volunteer connections for community impact, incentivizing event access through donated time.
- Dynamic frontend to showcase events and opportunities, ensuring an engaging user experience. Designed and implemented a robust backend for secure data management, real-time updates, notifications, and comprehensive reporting.

Assessment Creation Tool for eLearning (THOR) | *PHP, MySql, Underscore.js, Bootstrap*
- Platform automating diverse assessment creation, grading, and reporting for educational institutions, businesses, and individuals.

Other Academic Projects | *PHP, Node.js, Nest.js, Express.js, MySql, Underscore.js, Bootstrap*
- Personal Portfolio   , Mono Repository, Chat Application, Restaurant Website

Education

Vellore Institute of Technology, Bhopal   Aug 2023
Master of Computer Application (GPA: 7.69)   *Bhopal, Madhya Pradesh*
